# Assignment 1

As your first assignment, you are to create a personal website.

**Personal website:**
For a personal website, there should be at least four parts, and overview, personal info, professional info, and others.

Overview Part:
The overview should provide general information about yourself, including your name, your classification, your major, and should have a picture of you with a descriptive title below it.  It should also have links to your personal info part, your professional info part, and any other part you have created that would fit in.

Personal Info Part:
On this part you should describe yourself, your interests, hobbies, pets, family members, fraternities or sororities, or anything else that you want to include.

Professional Info Part:
This part should describe your professional interests.  It should list any professional organizations to which you belong, and generally anything else related to "what you want to be when you grow up." You should also have a link to a copy of your resume which should be in HTML format.

Other Pages:
These pages can be created at your discretion.  For instance, you might have a page devoted to your pet, or maybe a page devoted to your SO, or a page devoted to a special interest you have.
