Term project

Shopping mall website:

For a internet shopping website, there should be at least three parts: main page, product page, and cart page.

Main page:
The should have the introduction, and link to all the product pages.

Product page:
There should be at least 10 different products, and each product page should contain price and product detail, and images. There should be a button for adding product to cart.

Cart page:
The cart page should list all the products, also calculate and display the total price for all products. There should also remove button for each product in this page.

Coding:
The website can be written using HTML, CSS and Javascript.
